My SQL Project: Second Hand Car Dealer

1) Read Cars data

2) Total Cars: To get a count of total records

3) The manager asked the employee How many cars will be available in 2023?

4) The manager asked the employee How many cars is available in 2020,2021,2022

5) Clint asked me to print the total of all cars by year. I don't see all the details.

6) Clint asked to car dealer agent How many diesel cars will there be in 2020?

7) Clint requested a car dealer agent How many petrol cars will there be in 2020?

8) The manager told the employee to give a print All the fuel cars (petrol, diesel, and CNG) come by all year.

9) Manager said there were more than 100 cars in a given year, which year had more than 100 cars?

10) The manager said to the employee All cars count details between 2015 and 2023; we need a complete list.

11) The manager said to the employee All car details between 2015 to 2023 we need complete list
